

Weekly Coal Production provides timely information on coal: current statistics on the production of anthracite, bituminous coal, and lignite are provided each week; monthly, quarterly, and annual statistics on coal consumption, production, stocks, imports, and exports, and related supply and demand data are provided as they become available.

Weekly Coal Production is intended for use by the coal industry, the press, State and Federal Governments, policy makers, consumers, and analysts. Weekly coal production estimates are based on current trends in weekly rail carloadings of coal and current coal production trends as reported in *Coal Distribution* (Form EIA-6), monthly and quarterly coal production reports from State mine agencies, and *Coal Production Annual* (Form EIA-7a).

This report was prepared by the Energy Information Administration, the independent statistical and analytical agency within the Department of Energy. The information contained herein should not be construed as advocating or necessarily reflecting any policy position of the Department of Energy or any other organization.

This publication is available on an annual subscription basis from the Superintendent of Documents, U.S. Government Printing Office.

Weekly Coal Production

Energy Information Administration
Washington, D.C.

Production for Week Ended:
September 17, 1983

Released for Printing:
September 23, 1983

Highlights

Production of bituminous coal and lignite in the week ended September 17, 1983, as estimated by the Energy Information Administration, was 17,110,000 short tons. This was an increase of 2,431,000 short tons, or 16.6 percent from production in the previous week. Production in the corresponding week of 1982 was 16,625,000 short tons. Bituminous coal and lignite production from January 1 through September 17, 1983 totaled 539,054,000 short tons, 11.2 percent below production in the same period of 1982.

Production of Pennsylvania anthracite in the week ended September 17, 1983, as estimated by the Energy Information Administration, was 106,000 short tons, an increase of 15,000 short tons or 16.5 percent from production in the previous week. Production in the corresponding week of 1982 was 117,000 short tons. Anthracite production from January 1 through September 17, 1983 totaled 3,158,000 short tons, 14.0 percent below production in the same period of 1982.
